CASE STUDY - Eagle Street Rooftop Farms

Eagle Street Rooftop Farms is a 6,000 square foot green roof organic vegetable farm located on a warehouse rooftop in Greenpoint, Brooklyn. On the shoreline of the East River and with a sweeping view of the Manhattan skyline.

The farm realizes the benefits of a green roof while bringing hyper-local produce to the Greenpoint community.

As a model for the urban farming movement and the utilization of green roofs in a unique manner, Eagle Street Rooftop Farms operates a small community supported agriculture.

Rooftop Farms hosts a range of educational and volunteer programs designed to bring city-dwellers closer to their food source.
